

Banking and Insurance Solutions

Cost Cutting Solutions for Efficient Business Process Management

eDocumentus

Business processes of banking and insurance organizations are usually accompanied by a vast variety of business documents which usually come in different formats.

Prozone is offering solutions that can empower banking and insurance companies to efficiently manage all documentation and all processes related to organizing, creating, distributing and reviewing of all documents within the existing business processes.

This system allows the company to dramatically improve its workflow process, by creating significant savings in man-working hours thus providing an evermore efficient service to the company's customers. This software solution integrates existing software processes that are already in use by the company, streamlines them into a single workflow, allowing real time viewing and monitoring of every activity of any process.

eDocumentus

Automation of Business Processes

eDocumentus enables operations with large amounts of documents, central access to documents, while significantly reducing paper document usage. Over and above, all business documentation remains systematically organized and archived once the process is executed.

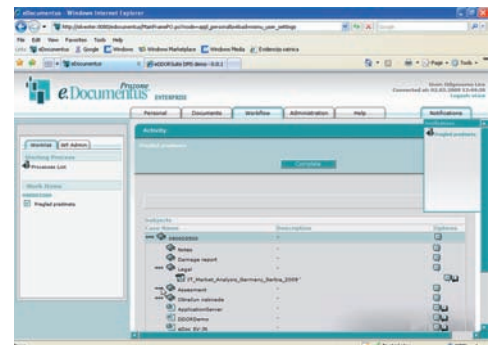

Main Features and Benefits

eDocumentus includes all the range of functions, namely: document identification, storing, retrieving, change tracking, versioning, workflow management, and document presentation. Our solution helps banks and financial service institutions to remain key players in a highly competitive market by speeding up effective processes and making it easy to follow all critical business processes throughout the organization.

The eDocumentus automation of business processes offers a new dimension in process function allowing real time access and analysis of any aspect of the entire business process.

The benefits are following:

- eDocumentus integrates all the processes from execution to finalization
- Automated management of claims, approvals and other specific operations
- Easy learning curve - no need for complex and expensive retraining of staff
- A long term solution for documents archiving
- Increased efficiency due to the workflow management
- Transparency of the business process
- Reduction of paper and document usage
- All the documents are stored in an orderly fashion
- The transfer of documents from one branch to another becomes instantaneous; documents that are stored in eDocumentus are stored in such a way that they can be retrieved quickly and easily by any branch.
- Company management can remotely access business processes and activity history within remote branches and supervise their activity
- Any unusual activity e.g. (multiple changes of a single document) will automatically trigger a process that sends an email to supervisors
- eDocumentus will not require any change of your company policies regarding document handling
- saving in (man-hour) time
- existing core software is not redundant
- A long term solution for documents archiving

single case review

selected process overview

A screenshot of the eDocumentus interface showing a table of attachments. The table has columns for 'Attachment', 'First Name', 'Last Name', 'Documentation State', 'Insurance', 'Locked', 'Created', 'Modified', and 'Options'. The table is currently empty, with the text 'Nothing found to display.' above it.

Attachment	First Name	Last Name	Documentation State	Insurance	Locked	Created	Modified	Options
Nothing found to display.
